The paper deals with the fundamentals of ozonation with an emphasis on the application of this technology to biopharmaceuticals. Examples are given for the treatment of monoclonal antibodies (mAbs), plasma proteins (e.g. albumin), peptides, and biopharmaceutical solutions. Factors influencing ozonation, such as ozone dose, solute, protein, and pH, are discussed, and concepts developed to account for the changes in the composition of the solution during ozonation are outlined. The suitability of several degrees of oxidation for degradation is evaluated. Washington (CNN) Republican Sen. Lindsey Graham said Sunday that b7e8fdf5c8
